| <b>Institutional Research Data Analyst</b><br><i>Northeastern Illinois University, Chicago IL</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Apr 2023 - Jan 2025 |
| <ul style="list-style-type: none"><li>Delivered 100+ data-driven reports on student trends for state reporting and institutional planning; wrote complex SQL queries using JOINS and window functions, reducing report turnaround time from approximately 12 to 4 days.</li><li>Administered and analyzed 2-3 campus-wide and 2-3 department-level climate surveys per academic semester, collaborating with stakeholders to interpret findings and inform decision-making.</li><li>Produced and presented descriptive analyses to ad hoc committees and stakeholders, supporting administrative decisions and state equity metrics.</li></ul> |                     |
| <b>Admissions and Records Representative</b><br><i>Northeastern Illinois University, Chicago IL</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Oct 2022 - Apr 2023 |
| <ul style="list-style-type: none"><li>Evaluated 100+ graduation applications and generated weekly reports on select student populations, transforming student data to support commencement planning and accurate diploma processing.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                 |                     |

## Academic Projects

|                                                                                                                                                                                                                                                                                            |                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Depression in U.S. Veterans - R</b>                                                                                                                                                                                                                                                     | Jan 2026 - May 2026 |
| <ul style="list-style-type: none"><li>Built and evaluated tree-based, linear, and logistic predictive models with train-test split and cross-validation.</li><li>Memory, sleep, work capability, and recreational activity levels were significantly associated with depression.</li></ul> |                     |
| <b>Predicting Average Rates of Preventable Hospitalizations - SAS</b>                                                                                                                                                                                                                      | Nov 2024 - Dec 2024 |
| <ul style="list-style-type: none"><li>Revealed a statistically strong positive association between the proportion of physical inactivity and preventable hospitalization rates, with the Southern region having the highest average of preventable hospitalizations.</li></ul>             |                     |

## Technical Skills

- Office and Communication Tools:** Microsoft Office Suite, Google Workspace, Zoom
- Data Analysis Tools:** R, SAS, Python (pandas, NumPy, TensorFlow, scikit-learn), SQL, SPSS, Qualtrics XM
- Visualization and Information Systems:** Excel, Tableau, IBM Cognos, Ellucian Banner Student 9
- Data Analysis:** Data Cleaning, Statistical Modeling, Survey Data Collection, Big Data Visualization, Predictive Analytics
